time on this drama and it is sure to be an
excellent one, as nearly all of their play-
ers of last year's carnival drama are in it.

Friday evening a large gathering of
young people from this vicinity and East

vestry. Mrs. Brandon Lawrence Mc-

By request your correspondent is writ-
ing these lines about an old neighbor,
friend, to so many in our little village,
Mrs. Nellie, wife of George Brownell,
who passed away at their winter home in
Bethel, Jan. 4th. She had been in poor
health many years, but was stricken worse
before going away this fall and she bade
her friends goodbye with tears in her
eyes, as she had the feeling she would
never come back again to live in her
home she loved so well. Although her
health did not allow her to go out among
her friends, she was very contented in her
home, but ever pleased to have her friends
come to see her and greeted them with her
ever pleasant smile. She had lived here
the greater part of her married life. The
deceased was eighty-four years old. She
leaves a husband and nephews and nieces
besides hosts of friends to mourn their
loss.

A few years ago her husband was very
sick and she was a faithful wife to him
as her strength would allow. Her many
friends will miss her when the husband
and Mabel Stanley, (who had been a
daughter to her for many years) come
back to their home in the spring. She
trusted every thing to Mabel, whom she
well knew was the only one who could
do so much for her and Mr. Brownell.

To half pint of water add
one ounce bay rum, small
box of Barbo Compound
and one-fourth ounce of
glycerine. Any druggist
can put this up or you can
mix it at home at very

the desired shade is ob-

STUDEBAKER
—pioneer and pacemaker

IN FREE WHEELING, the greatest advancement since the electric
starter, the pioneering spirit of Studebaker reaches the high point
of 79 years of pacemaking tradition.

Free Wheeling with positive gear control harnesses momentum—saves
gasoline and oil, saves chassis strain, and makes driving a continuous, de-
lightful thrill. The two finest cars in America—Pierce-Arrow and Lincoln
—have followed Studebaker's lead and adopted Free Wheeling. All cars
must eventually offer it.

But Free Wheeling is only one of a long list of today's fine car essen-
tials which Studebaker pioneered.

Studebaker introduced the full-power muffler, greatly reducing engine
back-pressure and thus increasing effective horsepower.

Studebaker was first to provide ball-bearing spring shackles, which
can never squeak nor rattle but which permit unhampered spring and
shock-absorber action. Sealed in lubricant, they need no attention
whatever for 20,000 miles at a time.

Studebaker was first to eliminate 90

SUMNER

Does it pay to advertise? Well, the writer will say so, after noticing the increasing travel over the Thompson pasture after the appearance of that little item in this paper recently. Why, there were teams and trucks galore from all over during the previous week. The team came from the far end of Hartford, Yes, Leland Andrews with his large truck loaded to capacity. Mr. Farrar from over near the Canton road with a large truck, and while he was leaving the mill yard, he had the misfortune of breaking the Universal joint to his truck. Well, of course, he beat it for Donald Varney's and Donald returned right away, transferring the load of sawdust to his truck, and connected the disabled machine by way of a chain, turned on the gas, and Donald was on the way with the whole outfit.

From near the Backfield border came John Bonney and his brother, Wilkes, with a public house load of lumber, being quite a distance from home, Wilkes only made the writer a brief call, and after shaking hands, Wilkes started in by saying he heard that the writer had a wild dog in a cage, of course was told that he did have a dog but he is not in a cage, and asked him if he would not like to see him, his answer was, that he had heard about him, if he was not in a cage, he did not care to see him, and from that the conversation turned to the past traveling season, and both sides the time was limited and they hardly got to talking, when John said they must be moving. Anyone who is acquainted with Wilkes will agree that if there is anything the other fellow can do we do believe this man can duplicate the trick. And he has the tools to do it with, and for instance, if you should happen to have a horse hair that you wish very curious to know just what it weighs, consult Mr. Bonney. And upon your return home I bet you can tell your family what its actual weight is.

Now away back in the summer of 1914 the writer had fourteen boxes, including four that were very dark in color and during ninety days there were 500 people called here to see them, some of whom lived more than one hundred miles away, now it is safe to say that there were fifty cameras snapped at some of those boxes, and every one said that if the pictures came out good that they would send one of them, now how many pictures do you suppose the writer got? Well, this same Wilkes Bonney came along one pleasant morning with his camera, and with my assistance, only in the way of trying to keep them quiet, he got a perfect picture of one of the boxes, and with some of the writer's fox stories, they were published in several sporting magazines, for which the writer received congratulations from as far away as Minneapolis and Texas. Well, it is one of the hardest pictures that one could take, for seldom, if ever, all of them are quiet at the same time, also there is the very fence between. We were more than an hour getting the pictures. But there are, no doubt, many people living today that will tell you they were perfect and a handsome picture. Back to the summer trail here, the writer did not know, but one of the most popular people in this procession, last, but by no means least, was our old friend, Elroy Russell of East Sumner, who for so many years braved the winter storms as our R. F. D. man. Oh, boys, how it did snow when he went past the house, homeward bound!

January 23, some children came in from the sidewalk where they were playing marbles and one of them shouted, "Believe it or not, there is a herd of elephants coming down the Poland hill," and upon going to the door, we saw Donald Varney coming with the tractor snow plow, with Arion Farrar as an assistant. They went down through to the Pen line and made it in just fifty minutes, leaving the road in such condition as to resemble the Newburyport Turnpike. In every way except the quantity of snow, which was piled high enough on either side of the road to fence a cow pasture.

Jersey Bartlett carried his mother and sisters, Grace and Gertrude, and brothers, Lionel and Irvin, over to his sister's, Mrs. Charles Russell's, for a couple of hours, Sunday afternoon.

Lem Bryant hustled around early and got his work done up Sunday morning so to call upon one of his neighbors. He just said to himself, "I will light up the old pipe and have a good smoke before starting out." And well he did, for just as his pipe got to throwing off blue rings that circled a couple of times and went up to the ceiling, Lemmie's attention was called to a very little fire that somehow way had started just back of the sliding room stove. Lem lost no time in dashing up the street towards P. V. Reddy's store for help, where he found a good bunch of young men who quickly responded to his alarm, and in a very short time Lem's homestead upon the corner was out of danger, and probably all on someone or his engine, or at least state machine to take a pleasant Sunday morning drive at the old pipe. There was but very little damage done.

It looks like the good old winter time around here with two and one-half feet of snow in the woods and all last week the thermometer went below zero during morning and to 14 and 16 upon two occasions and one day it only went up to below.

Walter Penley was up to the wood lot in the green woods, Friday of last week.

FRUIT GROWERS' MEETING

To Promote the Interests of Growing and

Marketing Apples

A meeting of the fruit growers of

Maine, was held at South Paris, Me., at

the Knights of Pythias building last Sat-

urday, when an organization was formed

to be known as The Maine Fruit Grow-

ers' Association.

The object of the organization is to

promote the interests of the industry of

growing and marketing apples and to be

governed by its members, for the best

interests of the industry.

No membership fee is required. Any

person engaged in the growing or mar-

keting of apples and desiring to benefit

the industry and the people engaged in

the same, in any line of legitimate ac-

tion that may be found desirable, and

at the present time desiring the removal

of the handicaps placed on the industry

by the interference and obstructions

placed on the industry by inspec-

tion and rules of inspection that are

not within the reasonable meaning

of the law, can become a member by plac-

ing his name on the records of the or-

ganization.

The following members were chosen as

an executive committee to promote the

interests of the organization and solicit

membership:

R. L. Cummings, G. H. McKee

W. H. Thibault, W. H. Thibault

H. N. Porter, C. S. Dudley

E. S. Dudley, E. S. Dudley

Wm. Jenkins, Wm. Jenkins

The present Maine apple law allows

scab on the A grade not to exceed in

area a circle one-fourth of an inch in di-

ameter. B grade may have scab not to

exceed in total area, a circle one-half

inch in diameter. The Federal law is the

same for the A grade. B grade of the

Federal law may have scab not to exceed

in area a circle three-fourths of an inch

in diameter. Under both of these laws

ten per cent of the fruit may be below

this standard. That would allow four-

teen pounds below grade in a barrel.

Inspectors with their so called rules

for inspection vary so from time to time,

and with different inspectors, that none

can forecast what the result of an inspec-

tor is to be. It frequently happens that

one inspector may pass a lot of apples

and another may reject the same lot.

This year some inspectors al-

lowed no scab that was visible at all, even

to a few small dots of late scab that were

scarcely visible to the eye.

The people connected with this indus-

try have been so prosecuted and annoyed

in this manner that the production of

apples has become unprofitable, and the

entire industry is being ruined. The quality

as the quantity of our crop has greatly

decreased. The result is that with only

87.1-2 per cent of a crop of the ten year

average in this country, we have prob-

ably 300,000 barrels of apples going to

waste in the orchards of Maine this sea-

son.

These gentlemen now come forward and

ask the State to enact a law that will give

them the right to come and cut our or-

chards down if they see fit to do so.

In opposition to this measure we pro-

pose an amendment to the present law,

that will allow all that may desire to do

so to continue under the present method

of the inspectors and their rules of in-

spection, and at the same time will pro-

tect others in the carrying on of their

business in a legal manner that is guar-

anteed under our constitution, by add-

ing to the present law Section 35 as fol-

lows:

All apples packed and branded in

the State of Maine under the present

sections of this law, must comply

with all regulations and be subject

to all penalties therein provided.

Apples not so branded may be packed

and shipped in compliance with the

requirements for sale in any State,

Territory or foreign country or

packed in closed packages without

branding, or under any brand that

may indicate grade or quality by the

use of letters, figures or words pro-

vided the same does not falsely rep-

resent the fruit contained therein."

We believe that the enactment of a

multitude of laws that have made the

rights of a citizen dependent on the fa-

vor of some board, commission or in-

pector, have become too common. While

they provide jobs for favorites, they are

destructive, not only of our business, but

of the rights of the citizens of a free

country.

The next meeting of the Maine Fruit

Growers' Association will be held at

South Paris at the Knights of Pythias

building on January 31st at 2 p. m. All

are invited.

Mrs. Bertha B. Davis of Locke's Mills

has been the guest of Mrs. Bertha S. Ab-

bott a few days this week.

Shaw's Orchestra played at Hebron

Center Grange Hall, Wednesday night,

where a wedding reception and dance

were held for Mr. and Mrs. Dwight Cus-

hman.

The Friendship Class of the Congrega-

tional Church is meeting with the

hostess, Miss Ruth Bolster. There

was a covered dish supper and a pleasant

evening.

Paris High 35; Oxford 28

Paris high basket weavers checked the

winning streak of Oxford high school in

the South Paris gym, Tuesday night with

a late rally. The game wound up 35-28.

Both teams made a handsome get-away

with Oxford a trifle to the good, handling

the ball. Shooting during the half was

erratic by spells, but the first session en-

ded in a colorful scramble with the score

14 all.

The last half went for speed and bet-

ter shooting. Just as Paris had for-

ward clicked off the ringers as his back

fed the goods. Smith, the center for Ox-

ford also was keen at the hoop and

dropped a row of neat ones from the
